

## ● PROFILE

Sixth-form student at Barton Peveril College studying IT, Engineering and Business at Level 3, and co-founder of SH Studios, a web design studio I run commercially, with eight clients and live sites in production. I build custom-coded websites end to end in React and TypeScript: design, build, client communication and aftercare. I have been writing software since I was 13, when I spent ten months beta-testing an encrypted communications app. I am looking for a software engineering apprenticeship where I can work on larger systems alongside experienced engineers.

## ● KEY ACHIEVEMENTS

- Delivered £1,700 of booked high-ticket work for a client within a day of launch: a full rebuild for a mobile car-detailing studio, with a quote-led booking flow I designed and coded.
- Co-founded and run a profitable web design studio while studying full-time for three Level 3 qualifications, handling pricing, client relationships and every line of the build.
- Achieved a Distinction in Website Development in Year 1 of my Level 3 IT qualification, the highest grade available.

## ● EXPERIENCE

### Co-Founder & Lead Developer · SH Studios Digital Ltd

2026 – Present

- Build responsive, fast-loading websites in React, TypeScript and Tailwind CSS, with Supabase back-ends deployed on Netlify.
- Manage the full client lifecycle (outreach, requirements, design, build, delivery and ongoing care plans), dealing directly with business owners.
- Built the studio's internal admin platform: a client and prospect system in React and TypeScript on Supabase, used to run day-to-day operations.
- Use AI-assisted development (Claude Code) as part of my workflow to ship client work faster without dropping quality.
- Own pricing, branding and project management, balancing commercial decisions against the technical build.

### IT & Business Support · Cool Move Logistics Ltd

2025 – Present

- Provide IT support across the business: troubleshooting hardware and software and keeping day-to-day systems running.
- Manage invoicing and billing, reconciling records and chasing payments through to resolution.
- Draft formal business correspondence, including supplier invoice disputes and penalty charge appeals.

### Kitchen Porter · The Chestnut Horse, Easton

2026 – Present

- Work three evening shifts a week through service, fitted around a full college timetable and my own business.

### Kitchen Porter · Figurati, Southampton

2025 – 2026

- Kept back-of-house running through high-volume service, supporting chefs with prep. Reliable and punctual throughout; left on good terms to take a role closer to my college timetable.

### Beta Tester · Pryvate, secure communications app

2022 – 2023

- Tested new builds of an encrypted communications app over roughly ten months, identifying and reporting bugs and usability issues back to the development team.
- Started aged 13: an early grounding in software testing, app security and how a development cycle actually runs.

## ● EDUCATION

- IT (Cambridge Advanced National, Extended Certificate), Year 1: **Distinction** in Website Development NEA; Merit in Developing Application Software.
- Engineering (Cambridge Advanced National, Extended Certificate), Year 1: Merit in Principles of Engineering.
- Business A Level (Edexcel): in progress. Year 2 exams January and June 2027.

King Edward VI School, Southampton · 11 GCSEs

- Computer Science A · Economics A · Geography A · Triple Science 7 · Maths 7 · English 6/5 · French 5 · RS Short Course 7
- Digital Leader: supported staff and pupils with classroom technology and IT.

● TECHNICAL SKILLS

|                  |                                                                       |
|------------------|-----------------------------------------------------------------------|
| LANGUAGES        | React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS                |
| BACK END & TOOLS | Supabase, Git and GitHub, Netlify, Stripe                             |
| DESIGN & UX      | UI/UX design, responsive design, wireframing, brand and visual design |
| AI TOOLS         | Claude Code, prompt engineering                                       |

● SELECTED PROJECTS

- **Rinse Revive Detailing**, [rinserevive.co.uk](https://rinserevive.co.uk). Full rebuild for a mobile car-detailing studio: multi-page site coded from scratch with a quote-led booking flow and video reels. Generated £1,700 of booked high-ticket work within a day of launch.
- **Kent Chemistry Tutor**, [kentchemistrytutor.co.uk](https://kentchemistrytutor.co.uk). Bespoke site for a private tutor, refined over multiple revision rounds to an exact brief.
- **F160 Revision Hub**, [f160-hub.surge.sh](https://f160-hub.surge.sh). Self-initiated revision web app built for classmates ahead of a Level 3 IT exam: notes, flashcards, quizzes and past questions. Built from coursework skills, used by peers.

● REFERENCES

*“Salvo was incredibly patient, listened carefully to my ideas, and was always willing to make adjustments until everything was exactly as I envisioned. The final website exceeded my expectations.”*

Dr Sandip Desai, Kent Chemistry Tutor

*“Best website makers ever. It was exactly how I wanted it, and any changes were done to a T. My website is unreal.”*
